

UNIQUE JOB OFFER FOR ALL-ROUND NURSE

Are you a nurse with heart and soul and you love variety and challenge? Then we are looking for you!

Job description:

- Education of daily subcutaneous injections in children who will be treated with growth hormone
- Performing anthropometry
- Performing technical acts during patient-related studies and tests
- Data management of patient-related studies according to Good Clinical Practice (GCP)
- Data entry for Belgrow (Belgian-Luxembourg Registry for children treated with growth hormone) and BELPUB (Belgian-Luxembourg Registry for children with puberty disorders)
- Attend meetings and help think creatively

Our expectations:

- You are a nurse
- You can work independently
- You have a flexible working attitude (no 9 to 5 mentality)
- You speak Dutch/French and English
- You have experience with Word/Excel and Access
- You have your own car and are willing to work at different locations in Belgium
- You are a team player who likes punctuality, organisation and orderliness
- You have social skills, are communicative and empathic

Salary:

- Hourly rate as an independent employee
